

CATALOGO GENERALE
GENERAL CATALOGUE

CONFALÖNIERI

Gruppo Confalonieri, con il brand storico Confalonieri, dal 1950 produce accessori e complementi per il mobile e l'arredamento; da sempre persegue un approccio al prodotto che pensa innanzitutto all'aspetto funzionale ed ergonomico che si concretizza, al termine del processo, in un buon oggetto di design.

L'obiettivo non è, dunque, la forma fine a sé stessa, ma una soluzione di design capace di integrare la funzionalità tipica di un prodotto utile e facilmente utilizzabile. L'attenzione alle tendenze e all'evoluzione del mobile e dell'arredamento più in generale, è alla base del progetto di Confalonieri, per consentire il dialogo tra il mobile stesso e l'accessorio.

Seguendo questo approccio, la maniglia talvolta è un'impugnatura caratterizzante, talaltra una variazione della superficie dell'anta o un elemento basilico rispettoso di pulizia e linearità; sempre, una soluzione originale per l'apertura del mobile.

La gamma di Confalonieri si è arricchita nel tempo con soluzioni per tutti gli ambienti e risposte alle diverse esigenze di utilizzo.

I prodotti Confalonieri vengono concepiti e progettati in Italia e industrializzati internamente seguendo i dettami dell'italian style. L'eccellenza è assicurata dal know-how specialistico acquisito in decenni di esperienza e attraverso il costante controllo della qualità lungo tutto l'arco dei processi produttivi.

Gruppo Confalonieri, with its historical brand Confalonieri, since 1950 produces accessories and complements for furniture and all the furnishing sector, unwaveringly approaching the product with special focus on the functional and ergonomic features that make a quality design item.

Hence, the goal is not form in itself, but a design solution that merges the functional traits typical of a product that is both useful and designed for easy use.

A keen study of trends and evolution of furniture underpins project Confalonieri to create interaction between the item of furniture and the accessory.

Following this approach, the handle can act, at times, as a characterizing grip, and at other times as a variation on the door surface or as a clear-cut linear basic element.

Unfailingly an original solution for opening the furniture item.

Confalonieri range has been enriched over time with solutions for all environments and responses to different user requirements.

Concept, engineering, development of equipment, industrialization, take place internally, following the Italian-style approach. Excellence is also guaranteed thanks to the specialized knowhow acquired over decades of experience and the constant quality checks carried out throughout the entire production process.

60

“ con Matrix, la maniglia non è più un mero elemento decorativo, piuttosto una parte dell'intero, capace di mimetizzarsi, coordinarsi, contrastare, arricchire o stupire. In ogni caso di appartenere al progetto stesso. ”

La maniglia con Matrix non è più forma ma supporto di finitura, la forma diventa neutra per raccordarsi con le forme del mobile e la maniglia diviene superficie materica o per sua finitura o per il materiale che supporta.

Con Matrix la maniglia diventa un elemento a disposizione del progetto. E' personalizzabile; il decorativo utilizzato dal produttore del mobile può essere applicato sulle maniglie per mantenere continuità di finitura. E' anche possibile supportare una stampa digitale personalizzata (un disegno, un logo, una scritta, una foto...).

Con Matrix è possibile utilizzare le maniglie rendendole invisibili o per richiamare il decorativo utilizzato su un'altra parte del mobile.

61

“ with Matrix, the handle is no more a decorative element only, rather a part of the whole, sometimes capable to camouflage, coordinate, counteract, enrich or surprise. In each case the handle belongs to the same project. ”

The handle with Matrix is no longer shape, rather a finishing support, the shape becomes neutral to match furniture lines and the handle becomes a material surface as for its finish or for the material it supports. The furniture handle with Matrix becomes an element available for the furnishing project. It is customizable; the decorative used by the furniture manufacturer can be applied on the handles to maintain continuity of the finishing. It is also possible to support a personalized digital print (a drawing, a logo, a text, a photo ...).

With Matrix it is possible to use the handles making them invisible or to recall the decorative used on another part of the piece of furniture.

Matrix collection

Design: FABIO CASIRAGHI_PAOLO NAVA DESIGN STUDIO

62

Esempio di utilizzo di Matrix "tono su tono" con le maniglie che risultano invisibili.
Example of Matrix application with same color or material so to have an camouflaging approach.

63

Applicazione di Matrix con inserto in ardesia a richiamare il top nella stessa finitura.
Application of Matrix handles with slate inlay to recall the kitchen top in same finishing.

Esempio di utilizzo di Matrix con le maniglie utilizzate in modo da richiamare la finitura opposta presente nella composizione del mobile.
Example of Matrix with handles used as to recall the second finishing used in the furniture composition.

Applicazione di Matrix con inserto in cemento a richiamare il top nella stessa finitura.
Application of Matrix handles with concrete inlay to recall the kitchen top in same finishing.

finiture disponibili (pag. 176)
 finiture innovative (pag. 177)

available finishings (page 176)
 innovative finishings (page 177)

note
 Maniglia con un'elegante sezione a "L" che viene fissata sul retro con viti mordenti. Il suo profilo garantisce un'ottima presa e un utilizzo di spessore anta da 14 a 25. La maniglia può essere applicata in sormonto del bordo e del retro o incassata.

notes
 Handle with an elegant "L" section that allows back fixation. Its profile provides an excellent grip and an application on door with thickness between 14/25 mm. The handle can be applied overlapping edge and back or recessed.

materiale metallo pressofuso
 finiture argento 7 cromo lucido nichel satinato

material die-cast metal
 finishings silver 7 polished chrome satin finish nickel

finiture disponibili (pag. 176)
 finiture innovative (pag. 177)

available finishings (page 176)
 innovative finishings (page 177)

note
 È una maniglia dal fissaggio tradizionale ma progettata in maniera tale da poter essere applicata anche a filo del perimetro dell'anta grazie ai fori di fissaggio abbassati. I punti di fissaggio sono nascosti al centro e sul lato mostra solo una "L" simulando un lamierino molto leggero. Al di là di questo suggerimento può essere liberamente posizionata in qualsiasi punto dell'anta (si consiglia applicazione orizzontale).

notes
 It is a conventional handle but designed to be applied also flush with the perimeter thanks to the lowered fixing holes. The attachment points are hidden in the center and by the side it shows only a "L" simulating a very lightweight section. Beyond this suggestion can be freely positioned in any part of the door (we recommend horizontal applying).

MB09150/A

MB09150/B

note
Maniglia da incasso su bordo anta/cassetto. L'incasso avviene praticando due fori ad interasse 128 mm sul bordo per i perni presenti sulla maniglia (si consiglia un gocciolo di colla/silicone per fissarla). L'incasso può essere a filo (praticando una fresata sul bordo dello stesso disegno della maniglia) oppure con leggero sormonto facendo solo i 2 fori per i perni. Ne risulta un effetto molto elegante, con la vista di un piccolo spessore ma che al tempo stesso garantisce un'ottima presa. Può essere montata sia in orizzontale che in verticale.

notes
Flush handle on door/drawer edge. The application is done by making two holes at 128 mm ctc dist. on the edge to insert the handle pins (we recommend a drop of glue/silicone to secure it). It can be fixed completely flush or with slight overlap. The result is a very elegant effect, with the view of a small thickness in the front, but providing an excellent grip at the same time. It can be mounted either horizontally or vertically.

available finishings
(page 176)
innovative finishings
(page 177)

note
Maniglia da incasso sul bordo anta/cassetto con fissaggio int. 96 mm.
Una maniglia che mantiene un'assoluta pulizia dell'anta.
Lo scasso viene realizzato con un solo passaggio della fresa seguendo il disegno della maniglia. Può essere posizionata sia in orizzontale che in verticale.

notes
Fitted handle to be fixed on the door/drawer edge, with fixing ctc dist. 96 mm.
The handle keep an absolute cleanliness of the door.
The recess is made with a single machining passage following the design of the handle. It can be positioned both horizontally and vertically.

available finishings
(page 176)
innovative finishings
(page 177)

note
Nella finitura bianco opaco, è possibile laccare in autonomia la maniglia come l'anta del mobile offrendo così una maggiore integrazione. Poiché la maniglia è costituita da due parti separate (impugnatura e fondello), è possibile creare in autonomia una finitura diversa ("tono su tono" o in contrasto) tra l'impugnatura e il fondello.

notes
In the matt white version the handle can be lacquered by the customer like the door to ensure better integration. Since the handle has two separate sections, grip and base can feature different finish created by the customer.

(page 177)

note
Incasto "a filo" dell'anta o "in appoggio". Nella finitura bianco opaco, è possibile laccare in autonomia la maniglia come l'anta del mobile offrendo così una maggiore integrazione. Poiché il fondo della maniglia è una parte separata, è possibile laccarlo in autonomia in contrasto o "tono su tono" con la finitura del mobile.

notes
"Flush" built into the door or "affixed". In the matt white version the handle can be lacquered by the customer like the door to ensure better integration. Since the handle's back is a separate item, the customer can lacquer it in the same-shade or a contrasting back compared to the finish of the furnishing item.

+ 1 fitted handle

come funziona

completamente integrata e facile da installare sull'anta, Touch è utilizzabile sia in verticale (con applicazione su armadi) che in orizzontale (su ante e cassettoni); in entrambi i casi, la maniglia può coincidere con la lunghezza dell'anta o del cassetto. Quando premuta, Touch dà accesso ad una rientranza ricavata nell'anta stessa; cessata la pressione, ritorna in posizione di riposo grazie ad un sistema meccanico.

this is how it works

fully integrated and easy to install in the door, Touch can be used both in vertical (with application in cabinets) and horizontal position (on doors and drawers). In both cases, the handle may coincide with the length of the door or drawer. Simply with hand pressure, Touch opening system provides access to a recess in the door itself, the pressure ceased, it returns to rest position through a mechanical system.

Touch/Soft system

international patent pending
brevetto internazionale depositato

come appare

Design molto pulito, con il medesimo materiale e finitura del mobile. Il sistema di apertura Touch/Soft, è posto sul retro dell'anta e risulta completamente nascosto nello spessore stesso del legno (min. 22 mm).

Touch/Soft garantisce la perfetta complanarità della superficie frontale della maniglia rispetto all'anta e offre una copertura posteriore per mascherare e rendere cieca la fessura che si forma tra maniglia e anta stessa.

Con il suo design semplice, Touch/Soft è il perfetto connubio tra funzionalità ed estetica ricercata. Il primo sistema di apertura che preserva la pulizia architettonica del mobile e che non necessita di accessori.

this is how it appears

Very clean design, with the same material and door finishings. The Touch/Soft opening system is set on the back of the door and completely hidden within the wood thickness (min. 22 mm).

Touch/Soft ensures perfect alignment between the handle front surface and the door.

With its simple design, Touch/Soft is the perfect combination of functionality and refined aesthetics. The first opening system that preserves the architectural simplicity of the cabinet and that does not need accessories.

serratura per mobile - furniture lock

materiale
tastiera in PVC
scatola in ABS
squadretta in metallo

finiture
bianco

material
PVC keyboard
ABS shell
strike plate in die-cast metal

finishings
white

note
Il prodotto consente di riservare
l'accesso ad un vano tramite
la chiusura di una serratura
azionata da un dispositivo
a comando elettronico. L'ordine
di apertura, infatti, viene inviato
tramite la digitazione sulla tastiera
di un codice segreto impostabile.
In caso di esaurimento della pila
interna, l'apertura dell'anta
è comunque consentita
dalla possibilità di appoggiare
sugli appositi spazi della tastiera
stessa una pila carica.

notes
This product permits
the opening of a furniture door
by means of an electronically
activated lock.
The instruction to open is given
by dialling a secret code.
If the internal battery dies,
the door is opened
by holding a new battery
to the two poles on the front
of the lock, and dialling
the code as normal.

nichel satinato

note
Dopo aver passato i cavi dal buco presente sul piano della scrivania, le due parti del passacavi si chiudono lasciando attraversare i cavi e si inserisce, infine, il prodotto nella scrivania.

material
die-cast metal

finishings
silver 7
polished chrome
satin finish nickel

notes
The two halves up the grommet clip together round the cables, after the cables have been passed through the hole in the desk-top. The grommet is then inserted into the desk-top.

materiale
ganci e vite in acciaio
scatola in nylon

finiture
nero

note
Aggancio regolabile per il fissaggio di mobili pensili. Consente di regolare, rimuovere e fissare nuovamente il pensile con estrema facilità. Si aggancia alla barra precedentemente fissata a muro e/o ad una vite appositamente inserita con il tassello a muro. La regolazione viene effettuata agendo sulla vite posta in alto. Il prodotto è in grado di sostenere fino a circa 60 Kg di carico verticale se agganciato alla barra, fino a circa 40 Kg se agganciato alla vite.

material
hooks and screw
made in steel, nylon box

finishings
black

notes
Adjustable connection for fastening suspended wall cupboards. It enables you to adjust, remove and refasten the wall cupboard with the greatest ease. It fastens to the bar previously secured to the wall and/or a screw that has been specially inserted using a wall anchor. It is adjusted using the screw positioned at the top. It can bear a vertical load of up to approximately 60 kg if fastened to the bar, and up to approximately 40 kg if fastened to the screw.

materiale
ganci e vite in acciaio
scatola in metallo pressofuso

finiture
zincato

note
Aggancio regolabile per il fissaggio di pannelli e specchiere. Consente di regolare, rimuovere e fissare nuovamente il pannello con estrema facilità.

material
hooks and screw made in steel
die-cast metal box

finishings
zinc

notes
Adjustable coupling for fastening panels and mirrors. It enables the panel to be adjusted, removed and secured again with extreme ease.

materiale

MA01054

giunto - joint

152

materiale
perno e spirale in acciaio
scatola in metallo
pressofuso
tappo di copertura in nylon

finiture
(tappo) bianco, nero

note
Giunto particolarmente indicato per l'assemblaggio di letti, tavoli (in legno o metallo) e, in genere, per tutti i casi dove è importante un bloccaggio perfetto, sicuro e con una forte tenuta. Il giunto consente un tiraggio costante e continuo anche nel caso di piccoli errori di posizionamento o di foratura.

material
steel connecting pin
and steel spiral
die-cast metal box
nylon cover cap

finishings
(cap) white, black

notes
Joint particularly suitable for the assembly of beds, tables (in wood or metal) and, in general, in all cases where perfect, secure locking and a strong hold are essential. The joint provides constant and continual tension, even in the event of small errors in positioning and drilling.

esempi di utilizzo / various uses

ACCESSORI PER ARMADI
WARDROBE ACCESSORIES

Flow System

design: EGIDIO PANZERA

Flow è il nuovo sistema di accessori per gli armadi e cabine armadio per la casa e per il contract. L'idea di progetto parte dalla volontà di immaginare con un'unica estetica coordinata ed armoniosa, tutti i molteplici accessori presenti nell'armadio contemporaneo.

Il sistema germina dall'elemento base quale il porta grucce estraibile, costituito da due profili rettangolari e un terminale maniglia; da chiuso, un sottile taglio orizzontale accoglie gli uncini delle grucce, generando, in tal modo, un'estetica elegante e minimale.

Il terminale maniglia è il dettaglio riconoscibile del sistema, si ripete in ogni configurazione, è l'elemento personalizzabile con il logo del mobiliere o del brand dell'hospitality, funge da maniglia ma anche da anello porta cruccia, inoltre svincolato dai profili dell'elemento base e montato in coppia sulle spalle, diviene porta tubo trasversale.

L'elemento base può essere arricchito di nuovi componenti per divenire, usato singolarmente sulla spalla, un porta cravatte-cinture, o altrimenti in coppia un cassetto o un porta pantaloni. Flow è prodotto nelle tonalità del bronzo, argento e nichel, ma è anche possibile rivestirlo con carta decoro legno coordinata agli interni dell'armadio.

nichel velour

Elemento scorrevole porta grucce caratterizzato da un disegno geometrico. E' compatto e rispetta la pulizia del mobile nel quale viene inserito. Una volta estratto accoglie comodamente le grucce che si appoggiano su una guarnizione che protegge la parte metallica dai ganci e mantiene più ferme le grucce durante lo scorrimento. Lo scorrimento è fluido, grazie alla combinazione del tubo in alluminio anodizzato e di bussole in Teflon. L'elemento di copertura può essere personalizzato (es: con il logo del produttore o con il nome dell'hotel).

MA01201/A0

MA01201/B0

Sliding rail for coat hangers characterized by a linear design. It's compact and respects geometrical shapes of the closet in which it is inserted. Once extracted, it welcomes the hangers that rest comfortably on a gasket strip that protects the metal part from the hooks and secures the crutches while scrolling. Scrolling is fluid, thanks to the combination of anodized aluminum tube and Teflon bushings. The covering element can be customized (e.g. with the manufacturer's logo or name of the hotel).

MA01201/A0

MA01201/B0

Elemento scorrevole porta cinture e cravatte. I ganci si possono sollevare per far entrare comodamente le cravatte e le fibbie delle cinture. L'elemento si applica sulla spalla destra facilmente grazie ad elementi di aggancio in plastica al quale si fissa con un grano. Nel caso fosse necessario distanziare maggiormente lo scorrevole dalla spalla del mobile è possibile utilizzare più elementi di aggancio.

MA01202

portacinture/cravatte scorrevole - sliding ties/belts rack

MA01202/A0

MA01202/B0

Sliding ties/belts rack. The hooks can be raised to comfortably enter the ties and belts buckles. The element is easily applied on the right shoulder thanks to the plastic coupling elements to which has to be fixed through a dowel pin. Increase distance between sliding and furniture shoulder is possible by using more coupling elements.

Il tubo del sistema è nella stessa finitura del supporto ed è caratterizzato da una sezione quadra sulla quale viene applicata una guarnizione per la protezione del tubo e per mantenere più ferme le grucce. Il tubo è disponibile in verghe da mm 3000, che il cliente può tagliare a misura; un tappo viene inserito nel tubo in modo da consentire il perfetto accoppiamento con il supporto che nasconde il taglio realizzato. La guarnizione è venduta separatamente.

The tube of the system is in the same finish of the support and is characterized by a square section on which is applied a gasket strip for the protection of the tube and to maintain steadier crutches. The tube is available in 3000 mm length, the customer can cut by measure; a plug is inserted into the tube so as to allow perfect matching with the support that hides the cut made. The gasket strip is sold separately.

Cassetti di servizio, con profondità minima, complementari ad eventuali cassetti realizzati in legno e con la caratteristica di potersi fissare molto facilmente sotto la mensola. Questo consente di non doversi necessariamente adattare alla larghezza dell'armadio: flessibilità d'uso e quindi di vendita, combinati con una facilità di installazione. E' possibile (previa richiesta) fissare il cassetto sotto una mensola in vetro (lasciando intravedere il contenuto).

Accessory drawers, with minimal height, to be used together with classic wooden drawers too. Their plus is the application: fixing under the shelf. This prevents you from having to adapt to the width of the closet: this entails flexibility of use and of sales. It is possible (upon request) to have a version that allows you to fix the drawer under a glass shelf (revealing the content).

Elemento scorrevole che consente di alloggiare le grucce anche in armadi poco profondi. Anche con un peso notevole, il meccanismo interno del prodotto consente la massima facilità di scorrimento. Il particolare design contraddistingue questo prodotto dai prodotti presenti oggi sul mercato, in quanto tutto in alluminio, dal disegno molto moderno, grazie anche all'insero che funge da impugnatura che garantisce un'ottima presa. La zigrinatura sullo scorrevole impedisce alle grucce ospitate di schiacciarsi tra loro rovinando gli abiti sostenuti.

This sliding rail is applicable in shallow wardrobes and under shelves. Even when fully loaded the internal bearings in this product ensure a smooth easy slide. In addition to its smooth running action, this product is highly appreciated for its modern design, which sets it apart from other products on the market. The attractive ring handle adds an extra design element, while the teeth on the bar prevent the coat hangers from moving when the slide is moved in or out, protecting the clothes. The version in anodised aluminium guarantees maximum respect for the environment, being completely recyclable.

Esempi di applicazione delle finiture innovative

Le finiture innovative di Confalonieri sono il risultato di una approfondita analisi di mercato e delle tendenze in atto nel mondo dell'arredamento, con riferimento ai colori e alle essenze più diffuse.

E' possibile utilizzare il prodotto Confalonieri tono su tono rispetto al supporto sul quale è applicato (per una presenza più discreta), oppure in contrasto, con una maggiore visibilità, pur mantenendo coerenza con l'insieme.

Gli accessori e complementi di Confalonieri trovano la loro applicazione sui mobili e più in generale negli spazi arredati e diventano importanti dettagli in grado di "dialogare" con il contesto in cui sono inseriti, aggiungendo valore all'insieme.

antracite satinata – satin anthracite

Application examples of innovative finishing

The Confalonieri innovative finishes are the result of an in-depth market analysis and trends in the furniture world, with reference to the most common colors and veneers.

It is possible to use the Confalonieri products with a similar color approach with respect to the support on which it is applied (for a more discreet presence), or in contrast, with greater visibility, while maintaining consistency with the whole.

The accessories and complements of Confalonieri find their

application on furniture and more generally in the furnishing and become important details able to "dialogue" with the context in which they are inserted, adding value to the whole.
