SLIDING SYSTEM MASTER UNIVERSAL

TRADITIONAL SLIDING SYSTEM

- traditional sliding system for wardrobes with not-aligned doors;
- being modular, the system, which varies according to the load it can carry, lends itself to creating numerous versions with many different uses;
- rails made of anodised aluminium;
- the weight of the doors is leaned to the upper rail;
- automatic insertion with deadlatch of the base of the doors;
- great easy in the adjustment of the height and the door's verticality;
- sliding truck equipped with antifleeting device;
- FITTED WITH NEW SHOCK-ABSORBERS TO SLOW DOWN AND STOP THE DOOR.

PERFORATION DESIGN FOR THE DOORS

External upper truck H70

Interno upper truck H70

External lower slider H17

Internal lower slider H17

External lower slider H33

Internal lower slider H33

MODULARITY OF THE SYSTEM
